Ola Farhat Ibrahim

Frontend Developer | React.js & Next.js

Cairo, Egypt | +20 105 050 9022 | olafarhat579@gmail.com | LinkedIn | GitHub

PROFILE

Frontend Developer with hands-on experience building responsive, production-grade web applications using React.js, Next.js, and TypeScript. Recently led the frontend development of MiniMaxi, a full-stack AI-powered predictive maintenance platform, integrating a Java Spring Boot backend, real-time features, and role-based access control. Skilled in translating designs into clean, accessible interfaces, integrating REST APIs, and optimizing performance and SEO.

SKILLS

Languages & Frameworks: JavaScript (ES6+), TypeScript, React.js, Next.js, HTML5, CSS3

Styling & UI: Tailwind CSS, MUI (v7), Bootstrap, CSS Flexbox/Grid, Framer Motion, Figma-to-UI Implementation

State & Data: React Hooks, Context API, Redux (basics), Axios/Fetch, REST API Integration, Socket.io (real-time)

Backend Exposure: Java Spring Boot, PostgreSQL, JWT Authentication, Node.js/Express (basics)

Performance & Quality: SSR/SSG, Code Splitting & Lazy Loading, SEO Optimization, Jest & React Testing Library, Accessibility (ARIA basics)

Tools: Git/GitHub, Vercel, Railway, Chrome DevTools, VS Code, npm/Yarn

EXPERIENCE

Frontend Developer — Route Academy

June 2025 – December 2025

- Developed and maintained multiple responsive web applications using React.js and Next.js, following modern ES6+ best practices.
- Built reusable, modular UI components that reduced development time on subsequent features.
- Optimized page load performance using Next.js SSG/SSR and lazy loading.
- Integrated REST APIs using Axios and Fetch with React Hooks, Redux, and Context API for state management.
- Translated Figma designs into pixel-perfect, accessible interfaces using Tailwind CSS, Bootstrap, and modern CSS (Flexbox/Grid).
- Debugged and tested application code using Chrome DevTools and Jest, ensuring cross-browser compatibility.

PROJECTS

MiniMaxi — AI-Powered Predictive Maintenance Platform *(Graduation Project)*

Live Demo | GitHub

- Built the full frontend using React, TypeScript, and Vite, integrated with a Java Spring Boot backend (Railway) and PostgreSQL (Neon).
- Implemented full role-based access control (RBAC) for three user roles: company admin, engineer, and technician.
- Designed an AI-insight-to-work-order workflow, converting predictive alerts into actionable maintenance tasks with cost and spare-parts tracking.
- Added real-time updates with Socket.io, contextual notifications, bulk CSV import, PDF/image report export, and JWT-secured authentication.
- Deployed the frontend on Vercel and backend on Railway, and authored a full user manual (Word & HTML).

Dashboard UI Kit — Admin Dashboard

GitHub | Live Demo

- Built with Next.js 14, TypeScript, and Tailwind CSS, featuring interactive Line, Bar, and Donut charts (Recharts), searchable user management, and dark/light mode.

Shop Mart — E-Commerce UI Clone

GitHub | Live Demo

- Developed a responsive e-commerce application with Next.js, Context API, and CSS Grid/Flexbox, including cart functionality and product filtering, tested with Jest.

EDUCATION

B.Sc. in Computer Science & Artificial Intelligence — Expected 2026

Faculty of Computers & Artificial Intelligence, University of Sadat City

LANGUAGES

Arabic: Native **English:** Excellent
