Ola Farhat Ebrahim

Frontend Developer | React.js & Next.js

Email: olafarhat579@gmail.com | phone :(+20)1050509022

Address: Cairo, Egypt | GitHub: https://github. com/olafarhat55

LinkedIn: https://www.linkedin.com/in/ola-farhat

Summary

Front-End Developer specializing in React.js and Next.js, with hands-on experience building responsive, high-performance web applications and translating Figma designs into clean, accessible UI. Passionate about maintainable code, performance optimization, and great user experience.

Core Skills

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3
- **Frontend Development:** React.js, Next.js, React Hooks, Functional Components, Component-Based Architecture, Responsive Web Design
- **State Management:** Redux, Context API, Flux Architecture Patterns
- **Frontend Architecture:** Reusable Components, Separation of Concerns, Maintainable Code, OOP, Functional Programming, Design Patterns
- **Styling & UI:** Tailwind CSS, Material UI (MUI), Bootstrap, CSS Flexbox, CSS Grid, Framer Motion, Figma
- **APIs & Integration:** REST APIs, Axios, Fetch API, JWT Authentication, Socket.io
- **Performance & Quality:** Lazy Loading, Rendering Optimization, Next.js SSR/SSG, SEO, Jest, React Testing Library, Accessibility (ARIA)
- **Tools & Platforms:** Git, GitHub, Vite, npm/Yarn, Vercel, Railway, Chrome DevTools, VS Code
- **Backend & DevOps Exposure:** Java Spring Boot, PostgreSQL, Node.js/Express (basics), CI/CD exposure

Education

Bachelor’s degree in Computer Science and Artificial Intelligence – Information Systems

Faculty of Computers and Artificial Intelligence, University of Sadat City (USC), Egypt, 2026

GPA: 3.25 / 4.0

Work Experience

DataOps Intern
National Telecommunication Institution (NTI), Egypt

- Built ETL/ELT data pipelines in Python (Pandas, NumPy) with batch processing, incremental loading, and data validation and cleaning.
- Wrote advanced SQL (joins, subqueries, window functions, stored procedures) and optimized queries across relational and NoSQL databases.
- Designed data warehouse models using Star and Snowflake schemas with fact and dimension tables and studied Data Lake and Lakehouse architectures.
- Processed large-scale data with Apache Spark (Spark, Data Frames, Spark SQL) and worked with Hadoop and HDFS concepts.
- Automated and scheduled data workflows added monitoring and alerts and applied CI/CD and data quality automation to data pipelines.
- build cloud data pipelines using Claud data services (Data Factory, managed Spark) and developed real-time streaming Apache Kafka
- Completed a Capstone Project applying the full data engineering lifecycle.

Projects

Minimax AI-Powered Predictive Maintenance Platform (Graduation Project)
Built the full frontend of an AI-powered predictive maintenance platform integrated with a Spring Boot backend, with role-based access and real-time updates.

- Developed the frontend with React, TypeScript, and Vite, integrated with a Java Spring Boot backend (Railway) and PostgreSQL (Neon)
- Implemented role-based access control (RBAC) for three roles: company admin, engineer, and technician
- Designed an AI-insight-to-work-order workflow that converts predictive alerts into maintenance tasks with cost and spare-parts tracking
- Added real-time updates with Socket.io, notifications, bulk CSV import, PDF/image report export, and JWT authentication

Dashboard UI Kit, Admin Dashboard
Developed a responsive admin dashboard with interactive charts, user management, and theming.

- Built with Next.js 14, TypeScript, and Tailwind CSS, featuring Line, Bar, and Donut charts (Recharts)
- Implemented searchable user management and dark/light mode

Shop Mart, E-Commerce UI Clone
Developed a responsive e-commerce application with cart and filtering features.

- Built with Next.js, Context API, and CSS Grid/Flexbox, including cart functionality and product filtering
- Tested components with Jest

- CompLib, React Component Library
  Developed a documentation site for a React component library with live previews, copy-to-clipboard code snippets, and props documentation.
- Built 38 interactive, fully typed components across 7 categories (Buttons, Inputs, Cards, Badges, Alerts, Modals, Navigation) using React, Next.js 15, TypeScript, and Tailwind CSS
- Implemented real-time sidebar search, a collapsible responsive layout, and a dark theme using React Context
- Pre-rendered all pages with Next.js static generation for fast loads
- Documented each component with a props table (type, default, required) and

SELECTED COURSES & CERTIFICATION

- DataOps Engineering Program, National Telecommunication Institution (NTI)
- Business English (35 hours), NTI, covering CV writing, professional emails, and interview preparation
- Frontend Development (React.js & Next.js), Route Academy | 2025
